EL-2630

SHARP SERVICE MANUAL

CODE : 00ZEL2630SM/E

MODEL EL-2630

STANDARD FUNCTION	12 digits	1 M

DISPLAY SECTION

123,456,789,012.ME

ELEMENT: Display tube	PARTS NAME: 13-BT-70ZB
NUMERAL: 12 digits	SYMBOL: 1 digit(s)
8 (3.6 × 7.8 mm)	M E

LSI

Name : LI24741	
Type : Dual in line	
Pin : 52pins	

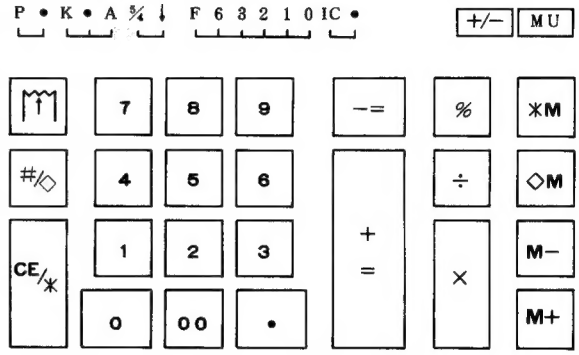
POWER SUPPLY	AC: ○	DC: X	

- BATTERY TYPE

AC only

- OPERATION TIME

KEY LAYOUT



KEY SYSTEM: QS-2 key

AC ADAPTOR	
RECHARGEABLE BATTERY	
POWER CONSUMPTION	17.7 W
AUTO POWER OFF TIME	minutes
MEMORY PROTELT	
DIMENSIONS(mm)	220 (W) 296 (D) 79.5 (H)
CALCULATIONS	

Four arithmetic calculations, constant multiplication and division, power calculation, add-on/discount calculation, repeat addition and substraction, adding mode, reciprocal calculation, item count calculation, make-up calculation, etc.

PRINTER SECTION

MODEL NAME	CP-181 (KI-0B1036CCZZ)
PRINTING SYSTEM	Flying method
PRINTING CAPACITY	18 digits
CHARACTER DIMENSION	1.6 (W) 2.8 (H) mm
INPUT BUFFER	stages
PRINTING SPEED	Approx. 3.0 lines/sec.
PAPER FEED SPEED	Approx. 3.0 lines/sec.
PAPER RELEASE MECHANISM	Yes
INK RIBBON	2 colors system (Red, Black)
INK ROLLER	
PAPER	Plain paper
PAPER SIZE (Roll paper)	58^{+0}_{-1} mm(W), 80 mm in diameter (max.) DPAPR1004CSZZ . . . 5 rolls/pack

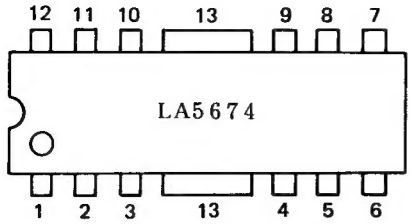
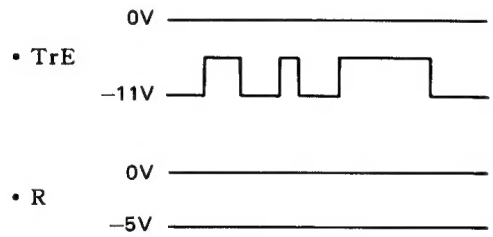
4. POWER SUPPLY IC (LA5674)

Printer motor brake incorporated power supply IC



Pin No.	Signal name	In/Out	Signal description
1	TrE	Out	VNG control signal
2	TrB	–	N.C.
3	R	Out	VNG control signal
4	HS	In	Detect level signal
5	VGG	Out	CPU power supply (–9V during display)
6	F4	In	Dispaly voltage control signal (–32V)
7	VN	Out	Display power supply (H: Display cut, L: Display)
8	iDF	In	Printer control signal
9	VCN	Out	Converter voltage select signal (–3V during printing)
10	VP	Out	Printer motor power output (+16.5V)
11	VPC	In	VP voltage adjusting pin
12	VNG	–	Display/printer reference voltage

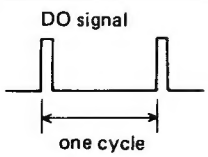
On-display signal waveform



4-1. LIS clock frequency adjustment

- The following adjustment is required after replacement of the CPU.
  Clock frequency can be adjusted by varying the frequency of the DO singal (sign digit grid signal) using the potentiometer VR1.
  The DO signal frequency can be known by measuring the GND to DO signal lines using the frequency counter.

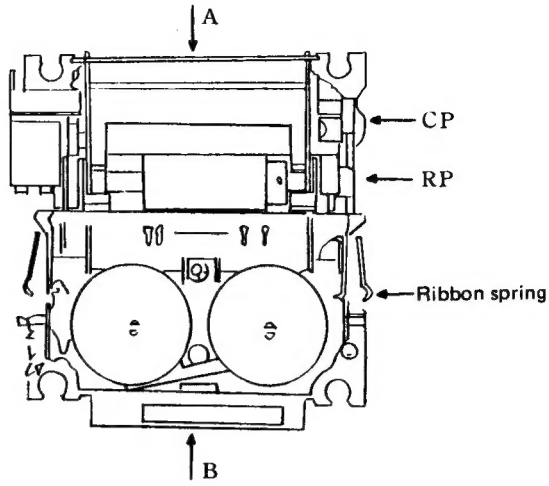
Test pin	Frequency range [ms]	Applicable model
GND-DO	10.10 ~ 10.16	EL-1630



Adjustment must be done after leaving the unit in the room temperature of 10 to 30°C for 30 minutes.

5. Service precautions

5-1. Printer handling cautions



- As components are exposed for the printer, grasp the the areas A and B for handling the printer. Hold the area other than A and B, it may result in deformation, maladjustment, and damage. (Special care must be exerted to avoid cracking the printer PWB).
- Never touch the ribbon spring, areas CP and RP. When installing the ink ribbon do not add an extraordinary stress to the ribbon spring.

5-2. Installing the shield plate

1) Peel away the double tack tape on the back side of the shield plate and bond it on the bottom cabinet (Fig. 1).
* When installing shield plate, determine the location using the square hole of the shield plate and the rib of the bottom cabinet rib.
2) Fold the soldered portion of the shield plate into two (Fig. 2).
3) Place the operation PWB over the shield plate, and solder the gray earth wire (See the PWB layout chart) to the soldered part of the shield plate (Fig. 2).
4) Fasten the operation PWB on the bottom cabinet using the screw.

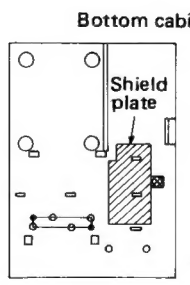


Fig. 1

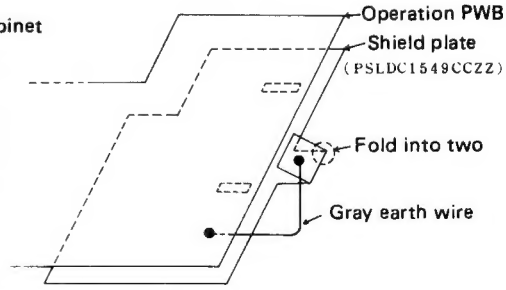

Fig. 2

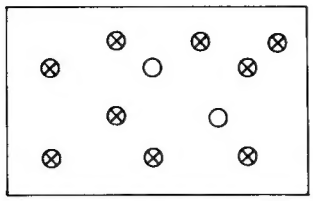
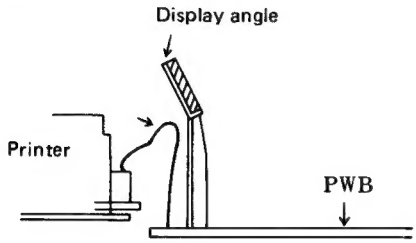
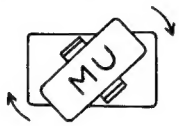
5-3. Fastening the key holding plate with screws (nine)



5-4. The printer F.P.C. must be moved towards the display angle side before the cabinet is installed.



5-5. The [+/−] and [MU] keys must be inserted askew and rotated.



5-6. Installing the printer

1) Insert a shock absorbing rubber onto the bolt and fasten it with the footing.
2) Install a shock absorbing rubber onto the cut in the printer.
3) Insert the footing prepared in 1) into the slit of the bottom cabinet and fasten it with the screw. This has to be done at two locations of the rear part of the bottom cabinet.
4) For two footings on the front, insert the footing into the rubber and fasten it with the screw. This has to be done at two locations of the front part of the bottom cabinet.
